### About the Calendar

The Indian Panchangam (Calendar) is one of the oldest in the world. Rishis observed the apparent movement of the Sun, movements of the Moon and the five planets (Mercury, Venus, Mars, Jupiter and Saturn) and recorded their findings in Vakyas. Nowhere in the world, the movement of the Moon is recorded and Nakshatra Pradhanyam is taken into consideration as to the birth of human beings. Similarly, the Rishis have identified Rahu and Ketu, the Chaya Grahas, known to the Western World as the Nodes, about 7000 years ago. The two epics of India – The Ramayana and the Mahabharata – profusely refer to the Nakshatra, the Thithi and the position of Rahu. The Indian Calendar is Geo-centric in character and therefore the position of Planets and Chaya Grahas will remain the same with respect to all places on the earth. Accordingly, this Calendar is prepared based on New York (EST) Time, by converting the end-times of Thithis & Nakshatrams computed for our Panchangam. For fixing Rahu Kala, Yama Gandam and Gulika Kala, the duration of the day (Sunrise through Sunset) is considered, as it will vary from place to place. Sunrise and Sunset times for New York have been adopted from [http://aa.usno.navy.mil/data/docs/RS\\_OneYear.php](http://aa.usno.navy.mil/data/docs/RS_OneYear.php) To determine Sri Vaishnava Ekadasi vrata days, we have followed scriptures from Sri Vaishnava Sampradhayam. Amavasya (●) and Pournami (○) have been marked based on Sraddha Thithi days. Thirunakshatram days have been fixed per specific nakshatram's duration being above 4 Hrs and 48 Mins beyond the day's Sunrise. This Sowra-Chandramana Calendar stands as a tall symbol of our ancient wisdom and culture. It is hoped that this publication would serve the purpose of the Indians in USA for performing religious rituals as well as celebrating traditional festivals.
